

# Particle spectrograph

## Wave operator and propagator

$\mathcal{B}_{0+}^{\#1} + \boxed{\beta \kappa^2}$   
 $\mathcal{J}_{1-}^{\#1} \alpha$

$\mathcal{B}_{1-}^{\#1} + \alpha$   
 $\boxed{0}$   
 $\mathcal{J}_{0+}^{\#1} + \boxed{\frac{1}{\beta \kappa^2}}$   
 $\mathcal{J}_{1-}^{\#1} \alpha$

Source constraints/gauge generators	Multiplicities
$\mathcal{SO}(3)$ irreps	
$\mathcal{J}_{1-}^{\#1 \alpha} == 0$	3
Total constraints:	3

Quadratic (free) action

$$S = \iiint \int (\mathcal{B}^\alpha \mathcal{J}_\alpha + \beta \partial_\alpha \mathcal{B}^\alpha \partial_\beta \mathcal{B}^\beta) [t, x, y, z] dz dy dx dt$$

## Massive and massless spectra

(No massless particles)

(No massive particles)

## Unitarity conditions

True
