The diagram shows two vertices connected by a horizontal dashed line representing a massive particle. The left vertex has two incoming lines (top-left and bottom-left) and one outgoing line (top-right). The right vertex has one incoming line (top-left) and two outgoing lines (top-right and bottom-right). All external lines are labeled with a question mark. The internal line is labeled with $J^P = 0^-$ above it and k^μ below it with an arrow pointing to the right.
